

What UID does for the Warfighter

- Material Management for the Warfighter
 - Had 7 parts need replacement on F16 fleet, identified 6 at location in data base.
 - Prevented completely replacing part on all F-16
- C17 saved Air Force 5.8M over life of a printed circuit board when it was

Bottom line: UID implementation translates transformation/modernization.

Where could UID potentially pay off for the Warfighter?

- Deployment planning and execution
 - Joint Readiness Program – GSORTS
 - JOPES asset tracking
- GCSS FoS logistics management
 - Use UID data element as common data element to track assets within FoS

Bottom line: Enhancement for Command and Control during deployment/employment processes.
